Environmental Impact Assessment for Proposed Keppel Sakra Cogen in Sakra Avenue, Jurong Island

The Keppel Sakra Cogen Project is a 600MW state-of-the-art, advanced combined cycle gas turbine (CCGT) power plant located in the Sakra sector of Jurong Island. Upon completion, the Keppel Sakra Cogen Plant will be the first hydrogen-ready power plant in Singapore, with the most cutting-edge and highest energy efficiency.

Keppel Energy has engaged Worley Pte Ltd as the Environmental Consultant to assess the potential environmental impacts that may arise from the proposed Project using the Environmental Impact Assessment (EIA) process. An Environmental Management and Monitoring Plan (EMMP) is developed with mitigation measures that will be put in place to prevent or minimize these impacts identified. The EIA report will be available for public feedback from 08-Aug-2023 to 05-Sep-2023 and will continue to be available for public viewing on Keppel Infrastructure <https://www.kepinfra.com/en/sustainability/>, with effect from 05-Sep-2023.

Keppel will consider all relevant public feedback before seeking final approval from the Government. Please contact Ms. Chin Wanli @ wanli.chin@advision.com for more information or to provide feedback.
